Q : What do you think about CET

A : The class and the teacher were very good. I was also satisfied with the meal at the cafeteria and the response of the school staff. I like the home of CET so I want to come back CET.

Before I came here, I think I couldn't manage my studying and my children well because they are small. But CET took care my children very carefully. They had a funny time for studying and enjoying with other students.

After graduating at CET, my children are confident to study at a local school in Philippines.
